

Installation Guide

SkillSwap — local setup instructions

Project Structure

```
design_championship/
├── backend/      Flask app + MySQL access + matching engine
│   └── routes/   one file per feature area
├── frontend/
│   ├── templates/ Jinja HTML pages
│   ├── static/    css/, js/, img/, uploads/
└── docs/         documentation for submission
```

Setup

1. Install MySQL (macOS):

```
brew install mysql
brew services start mysql
```

2. Create the database, tables, and demo data:

```
mysql -u root -e "CREATE DATABASE skillswap;"
mysql -u root skillswap < backend/schema.sql
mysql -u root skillswap < backend/seed_data.sql # optional: 13 demo profiles
```

The seed step is optional but recommended — see **Seeded Demo Accounts** below for the exact logins it creates.

3. Python environment:

```
cd backend
python3 -m venv venv
source venv/bin/activate
pip install -r requirements.txt
```

4. Configure the database connection if your MySQL user/password differ from the defaults (root, no password):

```
export SKILLSWAP_DB_USER=root
export SKILLSWAP_DB_PASSWORD=yourpassword
```

5. Run the app:

```
python app.py
```

Then open `http://localhost:5001`

Seeded Demo Accounts

If you ran `seed_data.sql` in step 2, the database already has 13 demo profiles ready to log in with — no sign-up required. If you skipped that step, these accounts don't exist yet, and you'll need to sign up your own.

All seeded accounts share one password: **password123**

Name	Email	Password
Riya	riya@skillswap.test	password123 (if seeded — see above)
Aarav	aarav@skillswap.test	
Kabir	kabir@skillswap.test	
Meera	meera@skillswap.test	
Dev	dev@skillswap.test	
Ananya	ananya@skillswap.test	
Rohan	rohan@skillswap.test	
Priya	priya@skillswap.test	
Karan	karan@skillswap.test	
Sanya	sanya@skillswap.test	
Vikram	vikram@skillswap.test	
Neha	neha@skillswap.test	
Arjun	arjun@skillswap.test
